(717) 763-0930 (ask for Safe Routes)

Properly trained crossing guards help to enhance student safety by providing an element of structure and authority to the roadways near schools. They can positively influence the behavior of children near intersections and help children cross roadways more safely. At this hands-on training, participants learn proper crossing guard techniques and practices so that they can return to their communities and set up similar training geared for local crossing guards.

The training provides standardized statewide crossing guard instruction to those who train crossing guards. There is **no charge** to attend this training.
